

FEATURE PANEL RADIATOR

INSTALLATION DETAILS FOR SINGLE AND DOUBLE HORIZONTAL PANEL RADIATORS WITH FULL FIN

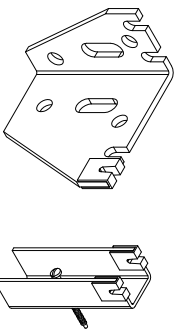

1. Mark location of mounting bracket in relation to backclip at rear of panel.
2. Drill wall, insert plugs and fix brackets securely to wall.
3. NOTE: The combination of spacers can be referred to on the chart below.
4. Fit the required spacer to back of panel
5. It is important that the wall brackets be mounted in the center of the backclip to allow for movement during normal expansion

It is recommended that when mounting the wall brackets to concrete walls the following screw and dowel specification is fulfilled.

Wall dowel 14 x 50
Screw 12 x 55

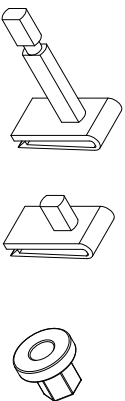

NOTE: LN type brackets are used for H10 radiators
A2 type brackets are used for the rest

Hanging Bracket

LN Type Bracket

A2 Type Bracket

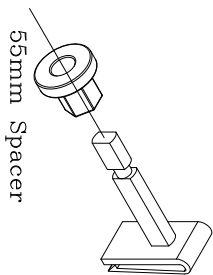

55mm Spacer

10.5mm Spacer

NOTE - Hanging brackets are enclosed within the packing.

PANEL TYPE	BRACKET TYPES		SPACERS	
	A2	LN	10.5mm	55mm
H10		X		X
H11	X			X
H12	X		X	
H20	X		X	
H21	X		X	
H22	X		X	
H22S	X		X	
H23	X		X	
H24	X		X	

This shows how the Spacers should be assembled.

55mm Spacer

10.5mm Spacer

RUST INHIBITOR

The use of a rust inhibitor is highly recommended. Failure to comply with British Standard 75993:2006 which encourages the use of a rust inhibitor to minimize likelihood of corrosion, may result in invalidation of manufacturers warranty
